

2020 Hive Monitoring Study Participant Checklist:

Fill out enrollment/participation information

(<https://www.surveymonkey.com/r/NHBA2020WinterMoistureStudy>)

Start monitoring Nov 1

Before wrapping try to document where the cluster is located and submit it to the study (heather.nhba@gmail.com)

- If possible take a FLIR picture (note – we are NOT requiring participants to have or buy a FLIR camera - some fire stations will loan out camera's that can take infrared pictures. If it isn't possible to take a picture that is OK.)

Before wrapping take a picture of the hive (if possible), and send it to the study (heather.nhba@gmail.com)

If using a mite board remove], clean (spray with Pam Original) and reinstall

Through the winter:

- If adding a candy board, winter patty or pollen patty – note its weight and the date that it was added – submit to the study.
- Monthly submit your hive readings to the study (if not live streamed)
- If possible, note where the cluster is located
